

Question Bank

Paper Code: OE – HU 801A

Paper Name: Business Analytics and Entrepreneurship

The figures in the margin indicate full marks.

Candidates are required to give their answers in their own words as far as practicable.

Section A (MCQ)

1. A coefficient which examines the association between a dependent variable and an independent variable after controlling the effect of other variables is:
 - a) Partial correlation coefficient
 - b) Simple correlation coefficient
 - c) Regression coefficient
 - d) Standard error
2. A statistical technique that develops an equation relating a dependent variable to one or more independent variables is called:
 - a) Correlation analysis
 - b) Regression analysis
 - c) Gap analysis
 - d) Discriminant analysis
3. The proportion of total variation in the dependent variable explained by the regression model is:
 - a) R^2 (Coefficient of Determination)
 - b) t-value
 - c) f-value
 - d) p-value
4. In multiple regression, when there are high correlations between predictor (independent) variables, the problem is known as:
 - a) Heteroscedasticity

- b) Multicollinearity
- c) Autocorrelation
- d) Sampling bias

5. The degree of linear association between two metric-scaled variables is measured by:

- a) Pearson correlation coefficient
- b) Analysis of Variance (ANOVA)
- c) Chi-Square test
- d) Beta coefficient

6. Which of the following is a fundamental assumption of Ordinary Least Squares (OLS) regression?

- a) The relationship is non-linear
- b) Residuals must be normally distributed
- c) Independent variables must be correlated
- d) Variance of errors must be inconsistent

7. Correlation analysis is primarily used to:

- a) Predict the exact value of Y
- b) Determine the cause-and-effect relationship
- c) Measure the strength and direction of association
- d) Reduce the number of variables

8. A technique used for data reduction and the discovery of underlying latent dimensions is:

- a) Multiple regression
- b) Factor analysis
- c) T-test
- d) Conjoint analysis

9. To determine how many factors to extract in a Factor Analysis, a researcher would look at:

- a) Eigenvalues (greater than 1)
- b) Scree Plots

- c) Percentage of cumulative variance
- d) All of the above

10. Which type of rotation in Factor Analysis maintains that the factors remain independent (orthogonal)?

- a) Varimax
- b) Oblimin
- c) Oblique
- d) Procrustes

11. What is the term for the numerical estimate of the impact an X variable has on a Y variable in regression?

- a) Coefficient
- b) Standard Error
- c) R-Squared
- d) Intercept

12. Fixed effects regressions are specifically used to help deal with:

- a) Random data errors
- b) Multicollinearity
- c) Omitted variable bias
- d) Sample size limitations

13. Principal Component Analysis (PCA) is a popular method under which category?

- a) Cluster Analysis
- b) Factor Analysis
- c) Regression Analysis
- d) Time Series Analysis

14. Data Analysis is a comprehensive process involving:

- a) Inspecting and Cleaning data
- b) Transforming data
- c) Modeling data to support decisions
- d) All of the above

15. Amongst the following, which are used for Predictive Analytics?

- a) Linear Regression
- b) Time series forecasting
- c) Data mining
- d) All of the above

16. Which method is used to determine if business requirements/objectives are being met compared to the current state?

- a) Conjoint analysis
- b) Gap analysis
- c) Cluster analysis
- d) Factor analysis

17. In regression, "Heteroscedasticity" refers to:

- a) Errors being correlated over time
- b) Unequal variance of residuals
- c) High correlation between independent variables
- d) Non-linear relationship between X and Y

18. Which statistic provides a "bounds" on our estimate (the range in which the true value likely falls)?

- a) P-value
- b) 95% Confidence Interval
- c) T-statistic
- d) F-statistic

19. In Factor Analysis, "Communality" refers to:

- a) The proportion of a variable's variance explained by the factors
- b) The correlation between two factors
- c) The error associated with a variable
- d) The rotation method used

20. Which of the following is a type of causal forecasting?

- a) Multiple Regression
- b) Exponential Smoothing

- c) Moving Averages
- d) Trend projection

21. Why are small businesses vital to a country's economy?

- a) They provide an outlet for entrepreneurs
- b) They offer specialist support to larger firms
- c) They act as innovators for new products
- d) All of the above

22. The Entrepreneurship Development Institute of India (EDII) is headquartered in:

- a) Mumbai
- b) New Delhi
- c) Ahmedabad
- d) Bengaluru

23. "Seed Capital" is best described as:

- a) Funds to purchase agricultural seeds
- b) Initial capital used to start a business or conduct R&D
- c) Long-term debt for expansion
- d) Government subsidy for established industries

24. A corporate manager who starts a new, distinct business unit within an existing company is a/an:

- a) Ecopreneur
- b) Technopreneur
- c) Intrapreneur
- d) Social Entrepreneur

25. Which risks are typically borne by an entrepreneur?

- a) Financial and Technical risks
- b) Personal and Social risks
- c) Psychological risks
- d) All of the above

26. What is the primary purpose of a "Feasibility Study"?

- a) To hire employees
- b) To determine if the venture is viable and identify barriers
- c) To finalize the office decor
- d) To pay off initial debts

27. According to Joseph Schumpeter, an entrepreneur is primarily a/an:

- a) Risk-manager
- b) Wealth-gatherer
- c) Innovator
- d) Supervisor

28. MSME-DI is an organization operating at which level in India?

- a) State level (under Central Govt. direction)
- b) District level
- c) Block level
- d) International level

29. Intellectual Property Laws in India provide protection for:

- a) Trademarks and Copyrights
- b) Patents
- c) Geographical Indications
- d) All of the above

30. PMKVY is a government initiative focused on skill development. It stands for:

- a) Prime Minister's Kaushal Vikas Yojana
- b) Pradhan Mantri Kaushal Vikas Yojana
- c) Pradhan Mantri Kristi Vikas Yojana
- d) Prime Minister's Krishi Vikas Yojana

31. As per Herzberg's Two-Factor Theory, which of the following is a "Motivator" (and not a Hygiene factor)?

- a) Salary
- b) Working conditions
- c) Recognition and Growth

d) Company policy

32. In Maslow's Hierarchy, the need to "be all that one can be" is known as:

- a) Social needs
- b) Esteem needs
- c) Self-actualization needs
- d) Security needs

33. McClelland's Need Theory identifies n-Ach as a primary entrepreneurial driver. n-Ach stands for:

- a) Need for Affiliation
- b) Need for Achievement
- c) Need for Accountancy
- d) Need for Authority

34. Falguni Nayar, a leading Indian woman entrepreneur, is the founder of:

- a) Biocon
- b) Nykaa
- c) Zivame
- d) Mobikwik

35. Which Indian venture capital firm is famously led by Ms. Vani Kola?

- a) Kalaari Capital
- b) Sequoia India
- c) Accel Partners
- d) SoftBank

36. Under the Factories Act 1948, appointing a Safety Officer is mandatory if a factory employs more than:

- a) 1000 workers
- b) 500 workers
- c) 250 workers
- d) 100 workers

37. Certification of "Standing Orders" is mandatory for industrial establishments with at least how many workers?

- a) 50
- b) 100 (varies by state, generally 100)
- c) 500
- d) 1000

38. "Distributive Bargaining" in industrial relations is often characterized as:

- a) A win-lose situation where one party gains at the expense of another
- b) A win-win situation where both parties collaborate
- c) A neutral mediation by a third party
- d) A government-imposed settlement

39. The process of using "Left-brain" skills in entrepreneurship involves:

- a) Pure artistic dreaming
- b) Logical planning and harvesting creative ideas into a business model
- c) Ignoring all financial data
- d) Focusing solely on emotional marketing

40. An "Induced Entrepreneur" is someone who starts a business because of:

- a) Their own inner passion
- b) Government incentives, subsidies, and policy support
- c) Family tradition
- d) Lack of other job options

41. Which Act regulates the health, safety, and welfare of workers in Indian industries?

- a) Factories Act, 1948
- b) Industrial Disputes Act, 1947
- c) Environment Protection Act, 1986
- d) Companies Act, 2013

42. "Creative Destruction" is a term associated with:

- a) Maslow
- b) Joseph Schumpeter
- c) David McClelland
- d) Frederick Herzberg

43. Social Entrepreneurship differs from traditional business because its primary goal is:

- a) Maximum profit for shareholders
- b) Solving a social or environmental problem sustainably
- c) Avoiding all taxes
- d) Running a non-profit NGO

44. SIDBI is a primary financial institution in India for:

- a) Large scale steel plants
- b) Small and Medium Enterprises (SMEs)
- c) Agricultural crop insurance
- d) Foreign direct investment

45. The "Incubator" in the startup ecosystem provides:

- a) Only office space
- b) Only legal advice
- c) Mentorship, resources, and support to early-stage startups
- d) Guaranteed customers

46. "Angel Investors" typically invest in which stage of a startup?

- a) Early/Seed stage
- b) Late stage/Pre-IPO
- c) Only after the company is profitable
- d) During liquidation

47. The term "Technopreneur" refers to an entrepreneur whose business is based on:

- a) Traditional retail
- b) High-tech innovation or scientific research
- c) Agricultural farming
- d) Manual labor services

48. Environment (Protection) Act was enacted in India in the year:

- a) 1947
- b) 1951

- c) 1986
- d) 1991

49. Which of the following is an internal barrier to entrepreneurship?

- a) Lack of technical skill or motivation
- b) High interest rates by banks
- c) Rigid government regulations
- d) Political instability

50. "Ideapreneurship" emphasizes:

- a) Copying existing business models
- b) Turning innovative ideas into marketable products or services
- c) Focusing on physical assets over intellectual ones
- d) Reducing employee count to save costs

Section B (Short and Long answer type questions)

Module 1:

1. Define the role of technology trend in moderating business decision.
[Module1/CO1/Understand/IOCQ] (5)
2. Explain how Business Analytics helps organizations improve decision-making in different industries such as banking, retail, and manufacturing.
[Module1/CO1/Understand/IOCQ] (5)
3. Define Gap Analysis with example. [Module1/CO1/Remember/LOCQ] (5)
4. Explain the steps involved in conducting Gap Analysis.
[Module1/CO1/Understand/IOCQ] (5)
5. Discuss the importance of Business Analytics as a business decision-making tool. [Module1/CO1/Analyze/IOCQ] (5)
6. Discuss various branches of Business Analytics with examples.

[Module1/CO1/Understand/IOCQ] (10)

7. Explain the significance of using Spreadsheets for descriptive analytics in small-scale entrepreneurial ventures.

[Module1/CO1/Understand/LOCQ](10)

8. Based on a case study of the Smartphone Market, analyze how a leading brand (e.g., Apple or Samsung) uses predictive analytics to anticipate shifts in consumer behavior before a "Gap" actually opens in the market.

[Module1/CO1/Analyze/HOCQ] (15)

9. Formulate a comprehensive Gap Analysis plan for a startup struggling with low customer retention in the competitive smartphone accessories niche. Include the data collection methods and the specific analytics tools to be used. [Module1/CO1/Create/HOCQ] (15)

10. i) Differentiate between parametric and non-parametric data with example. [Module1/CO1/Analyze/IOCQ] (7)

ii) Explain the features of panel data and cross-sectional data with suitable examples. [Module1/CO1/Understand/IOCQ] (8)

11. "Business Analytics transforms raw data into actionable insights." Critically analyze this statement with reference to analytics on spreadsheets. Provide two real-world examples. [Module1/CO1/Analyze/HOCQ] (15)

12. Business Analytics is widely used across various industries to improve efficiency and performance. Analyze the role of Business Analytics in sectors such as banking, investment, manufacturing, retail, pharmaceuticals, travel, and sports. Explain how analytics helps these industries in strategic decision-making with suitable examples.

[Module1/CO1/Analyze/HOCQ](15)

Module 2:

13. Explain the primary objective of Factor Analysis in business research. How does it help in reducing a large number of variables into fewer dimensions? [Module2/CO2/Understand/LOCQ] (5)

14. Explain the different types of data in statistics. Distinguish between nominal, ordinal, discrete, and continuous data with suitable examples. [Module2/CO2/Understand/LOCQ] (5)
15. Define Similarity Measures in the context of Cluster Analysis. Briefly describe the difference between Euclidean distance and Manhattan distance. [Module2/CO2/Understand/LOCQ] (5)
16. Identify three key Indicators for Model Fit in Logistic Regression (e.g., Likelihood Ratio, Pseudo R-squared). How do they help a researcher validate a model? [Module2/CO2/Apply/IOCQ] (5)
17. Discuss the concept of Linear Discriminant Analysis (LDA). Under what specific business conditions would a researcher choose LDA over basic regression? [Module2/CO2/Analyze/IOCQ] (5)
18. Describe the step-by-step process of Predictive Modelling. Illustrate its application in a retail business attempting to predict customer churn based on historical transaction data. [Module2/CO2/Apply/IOCQ] (10)
19. Compare and contrast Factor Analysis and Cluster Analysis. Provide a business scenario for each where one technique would be more appropriate than the other. [Module2/CO2/Analyze/HOCQ] (10)
20. Design a framework for applying Cluster Analysis to segment a bank's credit card customers. Specify the variables you would choose, the clustering algorithm to be used, and how the results would influence a targeted marketing strategy. [Module2/CO2/Create/HOCQ] (10)
21. Critically analyze the Application of Logistic Regression in Predicting Risk in Portfolio Management. How can this model help a fund manager distinguish between "Default" and "Non-Default" assets in a volatile market? [Module2/CO2/Analyze/HOCQ] (10)
22. Develop a comprehensive case for Predictive Modelling in a startup environment. Evaluate the trade-offs between model complexity (accuracy) and interpretability for a founder who needs to make rapid strategic

decisions. [Module2/CO2/Evaluate/HOCQ] (10)

23. The Daily Expenditure on Education (X1) and entertainment (X2) of five families are as follows:

Family	X1	X2
A	10000	6000
B	8000	2000
C	9000	3000
D	10000	5000
E	8500	3000

Group the observations in Clusters using the graphical plot.
[Module2/CO2/Apply/IOCQ] (5)

24. The Personnel Manager of a factory wants to find a measure which he can use to fix the monthly income of persons applying for a job in the production department. As an experiment project, he collected data on 7 persons from that department referring to years of service and their monthly income.

Years of service (x)	11	7	9	5	8	6	10
Income in '00' Rs (y)	10	8	6	5	9	7	11

Tasks:

Find the regression equation (y) on years of service (x).

Using it, what initial start would you recommend for a person applying for a job after having served in a similar capacity in another factory for 13 years?

[Module2/CO2/Apply/HOCQ] (15)

25. There are two series of index numbers, P for price index and S for stock of commodity. The mean and standard deviation of P are 100 and 8 and S are 103 and 4 respectively. The correlation coefficient between the two series is 0.4. With these data, work out a linear equation to read off values of P for various values of S. Can the same equation be used to read off values of S for various values of P? [Module2/CO2/Analyze/HOCQ] (15)

26. A factory manager wants to analyze the relationship between the **Age of a Machine (X in years)** and its **Annual Maintenance Cost (Y in ₹000s)** across 10 different production units.

Units	A	B	C	D	E	F	G	H	I	J
Machine Age (X)	42	36	55	58	35	65	60	50	48	51
Maintenance Cost ('000) (Y)	98	93	110	85	105	108	82	102	118	99

- Find regression equation of Y on X and X on Y
- Find the correlation coefficient (r) using the regression coefficients.
- Estimate the expected Maintenance Cost (Y) for a machine that is 45 years old (X = 45). [Module2/CO2/Apply/HOCQ] (15)

Module 3:

27. Define the three components of RFM Analysis (Recency, Frequency, and Monetary). How an "RFM Score" is typically calculated for a single customer? [Module3/CO2/Remember/LOCQ] (5)
28. Explain the concept of CHAID (Chi-square Automatic Interaction Detection). Why is it categorized as a "non-binary" decision tree? [Module3/CO2/Understand/LOCQ] (5)
29. Discuss how RFM analysis helps an entrepreneur in Enhancing Response Rates for a direct email marketing campaign. [Module3/CO2/Understand/IOCQ] (5)
30. Compare RFM Analysis and CHAID-based Predictive Modelling. In which business scenario would a startup prefer CHAID over a traditional RFM approach? [Module3/CO2/Analyze/HOCQ] (10)
31. Define market segmentation. Define various market segmentation types with examples. [Module3/CO2/Understand/IOCQ] (5)

32. Explain the situations where Chi-square analysis is used. Cite suitable examples. [Module3/CO2/Understand/IOCQ] (5)
33. Illustrate the "Goodness of Fit" method of Chi-square analysis with suitable example. [Module3/CO2/Apply/IOCQ] (5)
34. An IT audit of 2,000 corporate workstations was conducted to evaluate the efficacy of a new AI-driven Firewall. The data showed that 31 workstations were breached by malware even though the Firewall was active. However, 469 workstations with the active Firewall remained secure. Conversely, 185 workstations without the Firewall were breached, while 1315 workstations without the Firewall remained unaffected during the audit period."

Use the Cross-Tabulation (Contingency Table) method to present this data. Calculate the Row and Column totals to provide a complete overview for a security risk assessment. [Module1/CO2/Apply/IOCQ] (5)

35. i) Illustrate the process of RFM Analysis with reference to identifying best clients based on the nature of their spending habits.
[Module3/CO2/Apply/HOCQ] (10)

ii) Interpret the concept of Chi-square Automatic Interaction Detection (CHAID). [Module3/CO2/Understand/IOCQ] (5)

36. i) Illustrate the method of Chi-square Test of Independence.
[Module3/CO2/Apply/HOCQ] (10)

ii) Interpret the concept of Degrees of Freedom.
[Module3/CO2/Understand/LOCQ] (5)

37. i) Discuss the concept of null and alternative hypotheses.
[Module3/CO2/Understand/IOCQ] (5)

ii) Explain type I and type II errors in hypothesis testing.
[Module3/CO2/Understand/IOCQ] (5)

iii) Discuss the concept of level of statistical significance
[Module3/CO/2Understand/LOCQ] (5)

38. Test whether online suppliers is independent of gender at 1% significance level.

	Flipkart	Myntra	Amazon
Male	5	30	5
Female	10	30	20

[Module3/CO2/Analyze/HOCQ] (5)

39. A sample of 800 students appeared for a competitive examination. The results were found to be as follows:
Failed: 320 students
Third Grade: 270 students
Second Grade: 190 students
First Grade: Remaining students qualified (20 students)
The general opinion is that the grades should follow a ratio of 4:3:2:1 respectively. Test the hypothesis that this general opinion about the grades is appropriate at a 5% level of significance. [Module3/CO2/Evaluate/HOCQ] (10)

40. A survey was carried out by an estate agent to investigate the level of family income and value of the Flat bought as shown by table below. Test Whether there is an association between family income level and house value at 5% significance level.

	Family Income Level (Per Annum)		
Flat Value	Under Rs 6lakhs	6 lakhs to 10 lakhs	Above 10lakhs
Under 20lakhs	40	20	10
20lakhs to 50lakhs	10	40	20
Over 50 lakhs	10	20	30

[Module3/CO2/Analyze/HOCQ] (10)

Module 4:

41. Define Entrepreneurship and list three reasons why it is considered the backbone of economic development in a country like India.
[Module4/CO3/Remember/LOCQ] (5)

42. Discuss the characteristics of successful entrepreneurs. Cite the example of a successful Indian entrepreneur. [Module4/CO3/Analyze/IOCQ] (5)
43. Illustrate the challenges for the women entrepreneurs in India. [Module4/CO3/Analyze/IOCQ] (5)
44. Describe the various funding options for a new venture. [Module4/CO3/Understand/LOCQ] (5)
45. An entrepreneur is not just a business owner but a combination of specific skills and characteristics." Illustrate the top five characteristics and skills essential for a "Technology Entrepreneur" in the age of AI. [Module4/CO3/Apply/IOCQ] (5)
46. Explain the barriers to entrepreneurship and suggest possible measures to overcome them. [Module4/CO3/Analyze/HOCQ] (10)
47. Discuss the core characteristics of a successful entrepreneur using the life of an Indian business leader as a case study. Analyze how their psychological traits and use of market analytics contributed to their venture's sustainability. [Module4/CO3/Analyze/HOCQ] (15)
48. Describe the types of entrepreneurs with suitable examples. (15) [Module4/CO3/Remember/LOCQ]
49. Falguni Nayar, the founder of Nykaa, left her successful career in investment banking at the age of 50 to start an online beauty and lifestyle platform in India. She identified a gap in the Indian market where customers lacked access to genuine beauty products and expert advice. Through strong digital marketing strategies, data-driven customer insights, and partnerships with global beauty brands, Nykaa became one of India's leading e-commerce companies. The company also empowered many women entrepreneurs by allowing them to sell products through its platform. Despite challenges such as intense competition, supply chain management, and market uncertainty, Nykaa expanded rapidly and became a publicly listed company.

Case Questions

- i) Identify the entrepreneurial characteristics demonstrated by Falguni Nayar. [Module4/CO3/Understand/IOCQ] (5)
- ii) Analyze the factors that influenced the success of Nykaa as an entrepreneurial venture. [Module4/CO3/Analyze/HOCQ] (5)
- iii) Evaluate how women entrepreneurship contributes to economic development and innovation in India. [Module4/CO3/Evaluate/HOCQ] (5)

50. Case Study: The Yogurt Industry

Indians had the habit of preparing yogurt in their homes for centuries, but G.S. Bhalla (Bhalla), the CEO of Cocoberry, started the yogurt chain after realizing the potential for frozen desserts in the Indian market, which is India's largest yogurt chain. It was mostly promoted through low-cost marketing communication tools like word of mouth and publicity. Cocoberry extensively used social media for promoting its brand and products. Cocoberry's success attracted competition as some foreign yogurt chains started entering the Indian market. These foreign yogurt chains had more experience in the frozen yogurt business and had plans for speedy expansion in the Indian market. To expand its presence, Cocoberry also faced the challenge of convincing more Indian customers to buy frozen yogurt by paying a premium price.

i) Analyse the role of creating a marketing mix in the success of the marketing strategy of Cocoberry. (8)

ii) Analyse the overall entrepreneurial strategies that were followed by Mr. Bhalla for making Cocoberry India's largest yogurt chain. (7)
[Module4/CO3/Analyze/HOCQ]

51. i) Evaluate the role of socio-cultural factors in the promotion of successful entrepreneurs. (8)

ii) Assess the role of "risk-aversion" character of an individual entrepreneur in hindering the success of a new venture. (7)
[Module4/CO3/Evaluate/HOCQ]

52. Case Study: The Tata Nano

Ratan Tata, a renowned entrepreneur, had a dream of launching the world's cheapest car. On March 30, 2009, the Tata Nano was launched with an ex-factory price tag of INR 100,000. The car was the result of a five-year research and development project carried out by the Tata Nano development team. While developing the car, Tata Motors and its suppliers constantly made efforts to reduce costs while ensuring the quality of each and every component, including the engine, steering, wheels, tires, windshield washing system, gear shifter, etc.

i) Analyse the challenges in developing an innovative, cost-effective product. (8)

ii) Analyse the strategies that Tata has adopted in launching the Tata Nano. (7)[Module4/CO3/Analyze/HOCQ]

53. Evaluate the effectiveness of government-led entrepreneurial funding schemes in India with suitable examples. [Module4/CO3/Evaluate/HOCQ] (15)

54. Evaluate the importance of Angel Investment and Crowdfunding options with suitable examples. [Module4/CO3/Evaluate/HOCQ] (15)

Module 5:

55. Discuss the motivating factors as per Maslow's Need Hierarchy. [Module5/CO3/Understand/LOCQ] (5)

56. Discuss the motivating factors as per Herzberg's Two-Factor Theory. [Module5/CO3/Understand/LOCQ] (5)

57. Illustrate the entrepreneurial motivation factors as per McClelland's Need Theory. [Module5/CO3/Apply/IOCQ] (5)

58. Explain the importance of psychological and economic factors in determining the success of a new entrepreneurial venture. Cite how these factors influence the initial decision to leave a stable job and start a business. [Module5/CO3/Understand/LOCQ] (10)
59. Define the core characteristics and skills of an entrepreneur. Identify which specific skills are most critical for a "Technology Entrepreneur" in the current digital landscape. [Module5/CO3/Remember/LOCQ] (10)
60. List the primary objectives of the Factories Act, 1948, and the Environment (Protection) Act, 1986. How do these acts provide a regulatory framework for establishing a safe and sustainable manufacturing unit? [Module5/CO4/Remember/LOCQ] (10)
61. Describe the significance of the Industries Development (Regulations) Act, 1951, in the context of industrial licensing and registration for new entrepreneurs in India. [Module5/CO4/Understand/LOCQ] (10)
62. Compare and contrast Maslow's Hierarchy of Needs and McClelland's Need-Achievement Theory. Analyze how the "Need for Achievement" (n-Ach) acts as a primary motivator for entrepreneurs compared to basic physiological or safety needs. [Module5/CO3/Analyze/HOCQ] (15)
63. Illustrate the Steps in Creativity and discuss how an entrepreneur can "harvest right-brain ideas" using "left-brain analytical skills." Provide a practical business example where this synergy is essential. [Module5/CO3/Apply/IOCQ] (15)
64. Discuss the legal requirements under the Industrial Employment (Standing Orders) Act, 1946, and the Industrial Dispute Act, 1947. How do these regulations help in maintaining industrial harmony and defining the terms of employment for a new startup? [Module5/CO4/Analyze/HOCQ] (15)
65. "Risk-taking behavior and resilience are the most critical skills for long-term entrepreneurial success." Evaluate this statement by citing the example of a successful Indian entrepreneur (e.g., Ratan Tata or Falguni

Nayar). Analyze how their personal values and ethics influenced their venture's sustainability. [Module5/CO3/Evaluate/HOCQ] (15)

66. Design a comprehensive Legal Compliance Checklist for an entrepreneur planning to establish a new manufacturing unit in India. Include the necessary steps for registration, environmental clearances, and compliance with labor laws like the Factories Act and Standing Orders Act. [Module5/CO4/Create/HOCQ](15)

67. Examine the relationship between Creativity, Innovation, and Invention. Evaluate how the "Legal Protection of Innovation" (Patents/Trademarks) acts as both an incentive and a regulatory hurdle for new-generation entrepreneurs in sectors like Health or Tourism entrepreneurship. [Module5/CO3/Analyze/HOCQ](15)
